DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on August 4, 2010 has been entered.

Allowable Subject Matter

2. Claims 1,3-5,7-8,10-16, 44-53, and 61-75 are allowed over the prior art record.
3. The following is an Examiner's statement of reasons for allowance:
The closest prior art of record Shear et al. (US Patent Application Publication 2001/0042043) teaches a rights management arrangement for storage media that provides enhanced, more flexible security techniques and methods when the same media are used with platforms having higher security capabilities.
4. What they fail to teach or suggest:
As per claims 1, 47 and 61
None of the art of record, taken individually or combination disclose at least the steps/components of "producing a re-encrypted coding key by decrypting the transmitted encrypted coding key by the host device and re-encrypting the coding key by the host

device with the public key of the receiving interface device; transmitting by the host device the re-encrypted coding key to the receiving interface device; receiving, by the receiving interface device, the re-encrypted coding key; decrypting, by the receiving interface device, the re-encrypted coding key; performing a read or write operation in response to the I/O request by decoding read or write data using the decrypted re-encrypted coding key.”

As per claims 10 and 68

None of the art of record, taken individually or combination disclose at least the steps/components of “producing by the interface device a re-encrypted coding key by receiving from the host device a re-encrypted coding key comprising the transmitted encrypted coding key, encrypted by a public key of the interface device decrypting the re-encrypted coding key; and performing by the interface device a read or write operation in response to the I/O request by decoding read or write data using the decrypted re-encrypted coding key”

5. These distinct features render claim 1, 10, 47, 61 and 68 allowable.

Claims 3-5,7-8,10-16, 44-53, and 61-75 are either dependant upon claims 1, 10, 47, 61 and 68 or contain similar limitations and are therefore allowable for at least the same reasons.

Examiner notes that in regard to claim 61 the term “computer readable medium” is defined to be magnetic, electronic or optical storage as defined in the specification.
